PROFILE SUMMARY

Computer Science graduate and MERN Stack Developer with professional internship experience building production-ready full-stack web applications. Skilled in React.js frontends, Node.js and Express.js backends, MongoDB, and Firebase. Experienced in JWT authentication, role-based access control, and REST API integration. Promoted to **Team Lead** during internship for strong technical performance and leadership. Passionate about writing clean, scalable code and delivering user-centric products.

EXPERIENCE

MERN Stack Developer Intern → Team Lead | [Adveon Coding Bits](#)

Remote • Sep 2025 – Feb 2026

- Worked on multiple production projects within a team of **6–8 developers**, contributing to both frontend and backend implementation across the full development lifecycle.
- Built **10+ responsive UI screens and reusable React components** including role-specific dashboards for users, recruiters, and admins.
- Implemented **role-based route guards (RBAC)** with Firebase Authentication, securing navigation flows across multiple user roles.
- Proposed and delivered **UI/UX improvements** that enhanced website outreach and user engagement with a user-focused, analytical approach.
- Contributed to **backend API development** using Node.js and Express.js, integrating REST APIs with the React frontend for smooth data flow.
- **Promoted to Team Lead** — coordinated tasks, guided junior developers, and ensured timely project delivery while maintaining high quality standards.

PROJECTS

BloodLink | [MongoDB](#) • [Express.js](#) • [React.js](#) • [Node.js](#) • [JWT Auth](#)

- Developed a full-stack MERN platform connecting blood donors, recipients, and hospitals in real time — featuring urgency-based request prioritization, proximity-based donor search, and instant match notifications.
- Built a complete donor management system with identity verification, prescription upload, and availability tracking, alongside a hospital dashboard for monitoring live requests.
- Implemented an admin panel with a verification queue, donor authentication workflows, and a fraud detection module to maintain platform integrity and prevent misuse.

HireUp — Job Portal | [MongoDB](#) • [Express.js](#) • [React.js](#) • [Node.js](#) • [Firebase Auth](#) [\[Live ↗\]](#)

- Built a multi-role job portal with Firebase Authentication, protected role-based routes, job search with filters, one-click applications, and a real-time application status tracker.
- Developed dynamic React.js dashboards with a Node.js/Express.js REST API backend and scalable MongoDB schemas for job listings, applicant records, and recruiter pipelines.

ConversAI Chatbot | [React.js](#) • [Tailwind CSS](#) • [OpenAI API](#)

- Built an AI-powered chatbot with the OpenAI API supporting multi-turn dialogue, contextual memory, streaming responses for a natural typing effect, and a fully responsive Tailwind CSS interface.

SKILLS

Languages: JavaScript (ES6+), Python, HTML5, CSS3, Java, C

Frontend: React.js, Tailwind CSS, Bootstrap, Responsive Web Design, Component-Driven Architecture

Backend: Node.js, Express.js, REST API Design, JWT Authentication, RBAC, API Integration

Database: MongoDB, Mongoose, Firebase Realtime Database, Firestore

Tools: Postman, Git, GitHub, Vercel, Firebase, VS Code

EDUCATION

B.E. in Computer Science • Rizvi College of Engineering, Mumbai

2022 – 2026 • **CGPA: 9.34 / 10**

CERTIFICATIONS

- **AWS Academy Cloud Foundations** (*Amazon Web Services*)

Completed AWS-certified training covering core cloud computing concepts, global infrastructure, IAM, and key services including EC2, S3, and VPC networking fundamentals.

- **Web Development Fundamentals** (*IBM SkillsBuild*)

Completed IBM's foundational web development program covering HTML5, CSS3, JavaScript, responsive design principles, and modern frontend development workflows.
